Medidas de área do cilindro circular reto

Área da base

Área lateral

Área Total

Secção meridiana

A secção meridiana de um cilindro reto é uma região retangular de dimensões $2r$ (medida do diâmetro da base) e h (medida da altura do cilindro).

Cilindro equilátero

$$g = h = 2r$$

Áreas

Área da base

Área Lateral

Área Total

Volume

Secção meridiana e cone equilátero

Cone reto.

Cone equilátero.

Secção de uma esfera

Área da superfície e Volume da Esfera

$$V = \frac{4\pi r^3}{3}$$

$$A = 4\pi r^2$$
